

Brief CV

Name/中文姓名	Yong-Chang Guo/郭永昌	Gender	Male	
Title (Pro./Dr.)	Pro.	Country	China	
University/Department	Guangdong University of Technology/School of Civil and Transportation Engineering			
Research Area	Fiber reinforced polymer strengthened concrete structures			
<p>Vice Dean of School of Civil and Transportation Engineering and Director of Guangdong Engineering Technology Research Center for High-performance New Building Materials, Guangdong University of Technology.</p> <p>Professor Yong-Chang Guo received his PhD from the South China University of Technology in 2008. His research has focused on design theory and method of new type of concrete structures strengthened with fibre-reinforced polymer (FRP) composites. Outstanding work has been achieved in the key mechanical properties and durability of materials/members such as FRP confined concrete, FRP reinforced sea sand concrete, slag recycled concrete. Professor Yong-Chang Guo is mainly found by 3 National Natural Science Foundation projects and 1 national key research and development projects and has published more than 150 papers. Professor Yong-Chang Guo has been rewarded by second prize of Guangdong Science and Technology Award.</p>
